

RENEWABLE ENERGY

PARTICIPANT COUNTRIES :

ITALY I.O. SALVATORELLI MONETA IS G.L. BERNINI, NAPOLI TURKEY SCHOOLS

Abdülhamithan Mesleki ve Teknik Anadolu Lisesi,
Özel Yeni Yol Okulları,
Mehmet Akif Ersoy Anadolu İmam Hatip Lisesi,
Hatay Bilim ve Sanat Merkezi.
Aydın Fen Lisesi, Gümüşhacıköy Hasan Coci Anadolu Lisesi,
Osmanlı Çok Programlı Anadolu Lisesi.

Renewable energy is the energy obtained from inexhaustible sources in nature such as solar, wind, biomass, geothermal, hydroelectric and ocean. Electrical energy is obtained from renewable energy sources with appropriate systems, and these systems have less environmental damage compared to other systems using fossil fuels. Our country also has very rich resources in this field.

The aim of our project is to raise awareness about global warming with the flipped classroom teaching technique, to introduce renewable energy sources (wave, wind, sunlight, running water, etc.), to evaluate fossil fuels with the 6 hat method. In this process, it will be aimed to provide students with 21st century skills and to understand the project cycle.
